Warning! To prevent or reduce the risk of electrical shock or fire, do not expose this unit to rain or moisture.

Caution! There are no user serviceable parts inside this unit. Do not attempt any repairs yourself, doing so will void your manufactures warranty. In the unlikely event your unit may require service please contact American DJ.

Do not discard the shipping carton in the trash. Please recycle when ever possible.
Vertigo Tri LED™  General Instructions
To optimize the performance of this product, please read these operating instructions carefully to familiarize yourself with the basic operations of this unit. These instructions contain important safety information regarding the use and maintenance of this unit. Please keep this manual with the unit, for future reference.

Vertigo Tri LED™  Features
• Includes Built-In Hanging Yoke
• Sound-Active
• Light Weight
• LED Output Similar to 250W Lamp

Vertigo Tri LED™  Warranty Registration
The Vertigo Tri LED™ carries a three year (1095 days) limited warranty. Please fill out the enclosed warranty card to validate your purchase. All returned service items whether under warranty or not, must be freight pre-paid and accompany a return authorization (R.A.) number. The R.A. number must be clearly written on the outside of the return package. A brief description of the problem as well as the R.A. number must also be written down on a piece of paper and included in the shipping container. If the unit is under warranty, you must provide a copy of your proof of purchase invoice. You may obtain a R.A. number by contacting customer support at (800) 322-6337.

Vertigo Tri LED™  Operation
Introduction: The American DJ® Vertigo Tri LED™ is a dual output 3-in-1 LED moon-flower effect. This fixture is designed for mobile DJ’s, clubs, bands, roller rinks and any arena that requires a compact, light weight, easy to use unit.

General Operation: This fixture is designed to operate as a stand alone sound active unit, there is no need of a controller. It has been tested and there is no assembly necessary. The Vertigo Tri LED™ is ready to be plugged in out of the box, there is no power switch. Plug the unit in to a matching power outlet or into a power pack. Light output will be immediate when the unit is powered on. The unit must receive a sound source to operate normally. Use the sound sensitivity knob on the rear of the unit to adjust the sound sensitivity. Turning it clockwise will make it more sensitive to sound, turning it counterclockwise will make it less sensitive.

Vertigo Tri LED™  Fuse Replacement
Fuse Replacement: First unplug the power. The fuse holder is located at the rear of the unit next to the power cord. Using a flathead screw driver unscrew the fuse holder. Remove the bad fuse and replace with a new one.
Vertigo Tri LED™ Trouble Shooting

Trouble Shooting: Listed below are a few common problems that you may encounter, with solutions.

No light output from the unit;
1. Be sure you have connected your unit into a standard 110V wall outlet.
2. Be sure the fuse has not blown. The fuse is located on the rear panel.

Unit does not respond to sound;
1. Low frequencies (bass) should cause the unit to react to sound. Tapping on the microphone, quiet or high pitched sounds may not activate the unit.

Vertigo Tri LED™ Cleaning

Fixture Cleaning: Due to fog residue, smoke, and dust cleaning the internal and external optical lenses must be carried out periodically to optimize light output.

1. Use normal glass cleaner and a soft cloth to wipe down the outside casing.
2. Use a brush to wipe down the fan grill.
3. Clean the external optics with glass cleaner and a soft cloth every 20 days.
4. Clean the internal optics with glass cleaner and a soft cloth every 30-60 days.
5. Always be sure to dry all parts completely before plugging the unit back in.

Cleaning frequency depends on the environment in which the fixture operates (i.e. smoke, fog residue, dust, dew). In heavy club use we recommend cleaning on a monthly basis. Periodic cleaning will ensure longevity, and crisp output.
